

The **WorkStrategies Program** incorporates a partnership approach to workers' compensation claims and injury management. We partner with injured workers, physicians, employers, case managers, insurance companies and third party administrators (TPAs) to provide solutions to reduce associated costs and return injured workers to work as quickly and safely as possible.

We utilize experienced clinicians who are trained to make proactive clinical judgments and clinical recommendations related to a safe and rapid return-to-work. Our physical rehabilitation programs are job-related and injury-specific therapeutic interventions that are combined with the critical components of early intervention, effective communication and proprietary patient management systems (UMS) to insure appropriate utilization and physical rehabilitation outcomes.

OUR CUSTOMIZED RETURN-TO-WORK PROGRAM FEATURES:

- » **Early intervention strategies and ease of access through our Care Management Office (CMO).**
- » **Customized clinical strategies that are aggressive, functionally oriented and scientifically based to prompt early return to work.**
- » **Partnership approach for injured worker, healthcare team and employers.**
- » **Job simulation models for clinical advancement and early return-to-work.**
- » **Ongoing utilization/patient management.**
- » **A full product offering with seamless delivery of services that may include:**
 - Acute/Sub-acute physical and hand therapy
 - Work Conditioning/Physical Re-conditioning
 - Work Hardening
 - Comprehensive testing services such as Functional Capacity Evaluations (FCEs) and functional baseline testing
 - Job Site Analysis
